

Tax Cuts Now Mean Health Care Cuts Later

Even without the devastating health care cuts in the current tax plan, the tax reform package will lead to massive health care cuts later.

The Republican tax plan would add
\$1.5 trillion to the deficit.**

Where will Congress find the money
to fill that fiscal hole?

Oppose the Republican tax plan
if you care about health care.

**The blueprint for the tax plan is the 2018 Congressional budget resolution, which authorizes Congress to write a tax bill that increases the overall deficit by \$1.5 trillion over 10 years and allows the Senate to rush that bill through with only 50 votes.
