

Medicaid Matters to New Jersey's 2nd Congressional District (NJ-02)

New Jersey's Medicaid program (NJ FamilyCare) is a lifeline for South Jersey and the Jersey Shore

NJ FamilyCare provides health coverage for children, working families, veterans, vulnerable seniors, people with disabilities and many others in New Jersey.¹

NJ FamilyCare serves as the core financial backbone of South Jersey and the Jersey Shore's health care system, paying for care and services at local clinics and hospitals and serving as a critical engine for the local economy.

In NJ-02, Medicaid Serves:

A total of 181,900 people — **23% of all residents** in the district.²

A total of 66,100 children — **40% of all children** in the district.³

A total of **32,200 seniors** and **people with disabilities**.⁴

Nearly 2 million people in New Jersey are at risk of losing access to care if Congress cuts or caps Medicaid funding, forcing the state to offset budget holes by throwing people off coverage, cutting provider reimbursement, and/or eliminating essential health services.⁵ Any cut to Medicaid is a direct attack on the health and financial security of people living in South Jersey and the Jersey Shore and runs counter to the will of the vast majority of voters from across political parties who want Congress to continue to guarantee coverage for low-income people through Medicaid.⁶

A total of **82% of adults** want Congress to maintain or increase Medicaid spending.⁷

A total of **67% of Republicans** want Congress to maintain or increase Medicaid spending.⁸

A total of **71% of voters** want Congress to continue to guarantee coverage for low-income people through Medicaid.⁹

Protecting Medicaid Means:

CHILDREN IN NJ-02

Have access to newborn care, checkups, care for diabetes and asthma, and more.

Stay healthy and ready to learn, miss fewer school days, are more likely to graduate, and earn more as adults.¹⁰

FAMILIES IN NJ-02

Have access to cancer screenings, mental health and substance use disorder treatment, and diabetes and blood pressure medications.

Have less risk of medical debt and eviction and can better afford to buy groceries or pay rent.¹¹

SENIORS IN NJ-02

Have access to nursing home care, transportation to medical appointments, and home health services.

Stay healthy and receive needed care in their homes and communities.

Medicaid keeps families in South Jersey and the Jersey Shore healthy and working

Many low-wage jobs either do not offer health coverage or offer coverage that is unaffordable. Medicaid provides health coverage for workers at these jobs so they can remain healthy and earn income for their families.

- **At least 41,358 low-wage workers** in NJ-02 are covered by NJ FamilyCare.¹²
- Nationwide, **92% of adults** covered by Medicaid either work, care for a family member, have an illness or disability, or attend school.¹³

Cutting Medicaid would make our country's affordability crisis much worse for families in New Jersey who already face significant health care costs.

Medicaid is the bedrock of the health system in South Jersey and the Jersey Shore

NJ FamilyCare keeps hospitals in the district open. It pays for 29% of all hospital services at Inspira Medical Center Vineland and 20% of all hospital services provided by AtlantiCare Regional Medical Center and Shore Memorial Hospital.¹⁴ If Medicaid is cut, hospitals will treat more uninsured people, and the amount of uncompensated care will increase. Hospitals in NJ-02 are at risk of losing as much as \$247 million in federal matching funds if Congress cuts Medicaid.¹⁵ A total of 6% of the district's residents are already uninsured, and increased losses in patient revenue would put all South Jersey and Jersey Shore hospitals at risk.¹⁶

NJ FamilyCare also plays important roles in providing access to behavioral health care and nursing home care. Medicaid is the largest payer for mental health care, substance use disorder treatment, and other community services to curb the opioid epidemic and care for people with mental illness.¹⁷

NJ FamilyCare also covers 4 in 7 nursing home residents in New Jersey.¹⁸

Medicaid stabilizes New Jersey's state and local economies

Medicaid is the largest source of federal funding for New Jersey, accounting for 36% of the federal funds received by the state.¹⁹ Medicaid dollars ensure New Jersey can deliver essential health care without depleting resources reserved for other essential services, including public safety, transportation, housing and education.

Cutting Medicaid would make our country's affordability crisis much worse. Americans from all backgrounds just voted for economic security, imploring their representatives to lower costs on everyday needs, including health care. Cutting Medicaid would be a direct betrayal of constituents by making health care more unaffordable. **Families in South Jersey and the Jersey Shore already face significant health care costs:**

- **86% of people living in South Jersey** are worried about affording health care.
- **36% of people living in South Jersey** had to deplete savings, take on debt or sacrifice basic necessities to obtain medical care.
- **50% of people living in South Jersey** skipped needed care due to cost.²⁰

Congress has the responsibility to stand with families in New Jersey and across the country by protecting Medicaid and opposing any attempts to weaken this essential program.
