

Medicaid Matters to New York's 1st Congressional District (NY-01)

New York's Medicaid program is a lifeline on Long Island

Medicaid provides health coverage for children, working families, veterans, vulnerable seniors, people with disabilities and many others in New York.¹

Medicaid serves as the core financial backbone of Long Island's health care system, paying for care and services at local clinics and hospitals and serving as a critical engine for the local economy.

In NY-01, Medicaid Serves:

A total of 148,400 people — **19%** of all residents in the district.²

A total of 39,700 children — **27%** of all children in the district.³

A total of **31,200 seniors** and **people with disabilities**.⁴

Millions of New Yorkers will lose health coverage and care if Congress cuts or caps Medicaid funding, forcing the state to offset budget holes by throwing people off coverage, cutting provider reimbursement, and/or eliminating essential health services.⁵ Any cut to Medicaid is a direct attack on the health and financial security of people living on Long Island and runs counter to the will of the vast majority of voters from across political parties who want Congress to continue to guarantee coverage for low-income people through Medicaid.⁶

A total of **82% of adults** want Congress to maintain or increase Medicaid spending.⁷

A total of **67% of Republicans** want Congress to maintain or increase Medicaid spending.⁸

A total of **71% of voters** want Congress to continue to guarantee coverage for low-income people through Medicaid.⁹

Protecting Medicaid Means:

CHILDREN IN NY-01

Have access to newborn care, checkups, care for diabetes and asthma, and more.

Stay healthy and ready to learn, miss fewer school days, are more likely to graduate, and earn more as adults.¹⁰

FAMILIES IN NY-01

Have access to cancer screenings, mental health and substance use disorder treatment, and diabetes and blood pressure medications.

Have less risk of medical debt and eviction and can better afford to buy groceries or pay rent.¹¹

SENIORS IN NY-01

Have access to nursing home care, transportation to medical appointments, and home health services.

Stay healthy and receive needed care in their homes and communities.

Medicaid keeps families in NY-01 healthy and working

Many low-wage jobs either do not offer health coverage or offer coverage that is unaffordable. Medicaid provides health coverage for workers at these jobs so they can remain healthy and earn income for their families.

- **At least 33,689 low-wage workers** in NY-01 are covered by Medicaid.¹²
- Nationwide, **92% of adults** covered by Medicaid either work, care for a family member, have an illness or disability, or attend school.¹³

Cutting Medicaid would make our country's affordability crisis much worse for families in New York who already face significant health care costs.

Medicaid is the bedrock of the health system on Long Island

Medicaid keeps hospitals across Long Island open. It pays up to 19% of all hospital services provided at five facilities across Long Island, including hospitals in Huntington, Port Jefferson, Stony Brook and Smithtown.¹⁴ If Medicaid is cut, hospitals will treat more uninsured people, and the amount of uncompensated care will increase.

Medicaid also plays important roles in accessing behavioral health care and nursing home care. Medicaid is the largest payer for mental health care, substance use disorder treatment, and other community services to curb the opioid epidemic and care for people with mental illness.¹⁵

Medicaid also covers 5 in 8 nursing home residents in New York.¹⁶

Medicaid stabilizes New York's state and local economies

Medicaid is the largest source of federal funding for New York State, accounting for 59% of the federal funds received by the state.¹⁷ Medicaid dollars ensure New York State can deliver essential health care without depleting resources reserved for other essential services, including public safety, transportation, housing and education.

Cutting Medicaid would make our country's affordability crisis much worse. Americans from all backgrounds just voted for economic security, imploring their representatives to lower costs on everyday needs, including health care. Cutting Medicaid would be a direct betrayal of constituents by making health care more unaffordable. **Families on Long Island already face significant health care costs:**

- **79% of people living on Long Island** are worried about affording health care.
- **31% of people living on Long Island** struggled to pay medical bills.
- **58% of people living on Long Island** skipped needed care due to cost.¹⁸

Congress has the responsibility to stand with families in New York and across the country by protecting Medicaid and opposing any attempts to weaken this essential program.
