Now we have a few questions about two of these proposals...

Q14a: **[SITE-NEUTRAL/MEDICARE]** Proposal A would **prohibit health systems from charging Medicare more for the same medical procedure if it is performed at a hospital facility instead of at a doctor's office.** How much do you think this policy would lower healthcare costs?

Total Lower costs a little/not	22

Q14b: **[SITE-NEUTRAL/MEDICARE]** Next you will see two statements about Proposal A. Please indicate which statement you agree with more, even if neither is exactly right.

SUPPORTERS OF PROPOSAL A: We should not allow big health systems to charge more for the same medical procedure just because it's provided in a hospital setting, which leads to higher out-of-pocket costs for patients. This equal pricing policy will also reduce the financial incentives for big hospital systems to buy up physician practices, which drives up healthcare costs.

OPPONENTS OF PROPOSAL A: This policy will cut funding for Medicare, undermining quality care for America's seniors. It will also reduce funding for struggling hospitals, especially in our rural communities. We should let doctors make decisions about where to perform complicated medical procedures, not politicians in Washington.

Total Lower costs a lot/some	65
Total Lower costs a little/not	23

Q15b: **[MA BILLING]** Next you will see two statements about Proposal B. Please indicate which statement you agree with more, even if neither is exactly right.

(FORM A) SUPPORTERS OF PROPOSAL B: Insurance companies' Medicare Advantage plans overcharge patients and taxpayers by billions of dollars each year by claiming their patients are sicker than they are and even recording diagnoses for which patients receive no treatment. It's time to crack down on this waste, fraud, and abuse by big insurers, which weakens the Medicare system.

(FORM B) SUPPORTERS OF PROPOSAL B: Reducing excessive payments to Medicare Advantage insurance companies would save money that could be used to lower out-of-pocket costs and expand coverage in traditional Medicare for dental, hearing, and vision care. We need to stop Medicare Advantage overpayments so that we can improve coverage for people in traditional Medicare.

OPPONENTS OF PROPOSAL B: More seniors are on Medicare Advantage plans today than in traditional Medicare, and 32 million older Americans rely on the financial protections and benefits these plans provide. Second-guessing these plans' medical decisions will increase bureaucracy, raise costs, and reduce these plans' ability to offer important benefits such as dental, hearing, and vision care.
